SUMMARY

Finance and analytics professional with two years of experience across FP&A, consulting, and business intelligence, focused on financial modeling, forecasting, and quantitative analysis that support senior-leadership and capital-allocation decisions. Builds projection and valuation models in Excel (DCF, comparables), runs regression-based forecasting, scenario analysis, and sensitivity/stress-testing, and synthesizes data from multiple sources into executive-ready presentations. Direct experience in the fintech and consumer-payments sector, with applied research on emerging technologies and automation. Seeking to apply a rigorous, metrics-driven analytical foundation to investment due diligence and execution.

PROFESSIONAL EXPERIENCE

Populus Financial Group — Financial Analyst (FP&A)

Feb 2025 – Aug 2025

Irving, TX

- Built financial projection and forecasting models in Excel and Python supporting ~\$1.35M in monthly revenue across money-transfer, money-order, and bill-pay product lines, applying scenario analysis to evaluate revenue and cost outcomes under multiple assumptions.
- Conducted quantitative analysis of transaction cycles and revenue streams in the consumer-fintech/payments sector, using variance and trend models to identify revenue-leakage patterns and inform leadership decisions.
- Performed a cost-benefit and valuation analysis of data-center consolidation alternatives, quantifying multi-year savings and delivering a recommendation that functioned as a capital-allocation due-diligence review.
- Applied sensitivity and stress-testing to forecast assumptions to assess downside scenarios and improve forecast reliability for executive planning.
- Synthesized data from SQL, Excel, and Power BI into consolidated dashboards and reporting packages used in executive-level decision-making.

Ernst & Young — Technology Consultant (Client: Hunt Oil Company)

Aug 2024 – Jan 2025

Dallas, TX

- Conducted industry and performance research across seven years of oil-and-gas price differentials, building interactive Power BI models that supported planning, forecasting, and sector analysis.
- Synthesized data from multiple enterprise systems (SAP HANA, SQL Server) into a real-time reporting pipeline using stored procedures and data virtualization, accelerating refresh speed and enabling timely analysis.
- Partnered with engineering teams to migrate the AFENAV application to Salesforce APEX, improving data integrity and removing dependence on an external vendor system.

InfoServe BI LLC — Business Intelligence Reporting Analyst (Client: Holman Enterprises)

Jun 2023 – Aug 2024

Dallas, TX

- Developed advanced SQL queries and ETL workflows to consolidate data from multiple sources, strengthening data consistency and reliability across reporting environments.
- Managed an SAP BusinessObjects environment serving 790+ users and 70+ data universes, ensuring availability and timely issue resolution.
- Automated recurring BI reporting by integrating SAP BusinessObjects 4.2 with Oracle databases and scheduling tools, reducing manual effort and improving operational efficiency.

Baylor Scott & White Medical Center — IT Intern (Process & Data Analysis)

Jun 2020 – Aug 2020

Dallas, TX

- Resolved supply-chain inconsistencies affecting critical medical supplies during COVID-19 surges and partnered with ICU staff to redesign the patient intake workflow, improving availability and reducing wait times.

TECHNICAL & ANALYTICAL SKILLS

- **Valuation & Financial Modeling:** DCF, comparable-company analysis, LBO concepts, financial projections, budgeting, forecasting, scenario analysis, variance analysis
- **Quantitative & Econometric Analysis:** Regression analysis, forecasting models, sensitivity and stress-testing, risk modeling, trend analysis
- **Programming & Data:** Python, SQL (T-SQL, PL/SQL), VBA, Java
- **Business Intelligence & Presentation:** Power BI, Tableau, SAP BusinessObjects, Salesforce (APEX), advanced Excel, PowerPoint/MS Office
- **Data Systems:** Oracle, SAP HANA, SQL Server, ETL workflows, data warehousing

SELECTED ACHIEVEMENTS

- **Capital Allocation:** Built valuation and cost-benefit models that identified multi-year infrastructure savings through consolidation analysis.
- **Sector Analysis:** Analyzed revenue patterns and operational gaps across \$1.35M+ in monthly fintech/payments volume using variance and trend modeling.
- **Automation:** Implemented AI-driven forecasting and Python automation to streamline data consolidation and scenario analysis, reducing manual effort and improving precision.

EDUCATION

Thomas Edison State University — Bachelor of Arts, Liberal Studies

2024 – 2025

The University of Texas at Dallas — Bachelor of Science, Information Technology and Systems

2020 – 2024
